

Sirs: All elements of this proposal are OK except: 1. 29000 -300 wide band.NO
2. NO phone for Novice/Tech on 40 meters! Too crowded now. 7100-7125
cw,digital,packet. General-give 7200-300 and Extra-7125-300 SSB. Better - move
Novice/Tech to 30 meters in lew of expanded EuroSSB. NOT GOOD = 3950-4000
Novice/Tech SSB. Too much upheavel! BETTER = as FCC did with Novice 10 meter SSB
band, create new one at 3675 or 3700 - 3750 for Novice/Tech. Give 3550-3700 cw,
digital. Better for beginner - needs only 1 antenna without tuner!This would not
upset anyone except perhaps Canadians who might shift 50 Khz down for SSB.
Better idea than 160 for Tech/Novice.15 meters follow VEC proposal. Give phone
to 21,150/Extra, 21,250/Generals, 350-450/Tech,Novice. 10 meters - leave or
maybe give 29100-300 Phone.PLEASE DON'T MAKE QUESTION POOLS HARDER!Retain CW
test for General-OK, Advanced to Extra-OK, Novice, Tech, Tech+ = Tech OK. Think
about the 80 meter "Novice/Tech" phone idea!73, Tom WB8WIV " old Extra"
